

Overview

Kenexis, an independent consulting engineering firm that provides technical safety services for process industries, and other industries that manage risks related to chemicals or stored energy. Kenexis is helping change the way that safety and security are incorporated into industrial business practices by providing best-in-class software tools, associated training, and comprehensive technical support.

Kenexis was established in 2004 and is a privately held company. Kenexis is an engineering consulting firm with employees stationed globally. Kenexis headquarters is in Columbus, Ohio and Kenexis maintains offices in Houston, Dubai, and Singapore.

SERVICES

We provide a range of services process industries, and other industries that manage risks related to chemicals or stored energy by assisting in the design technical safeguards systems to mitigate those risks.

Kenexis exist to assist companies safeguard their process plants and production facilities that handle flammable and toxic materials. All such facilities have inherent risk, which must be managed using preventive controls to reduce hazards. Kenexis assists our clients in the design, implementation and testing of these systems. We continue research and development to improve the quality, accuracy, and repeatability of our engineering work products and we created software tools for our team and yours.

SOFTWARE

Our software is unique in that it is created and maintained by chemical engineers with many years of technical safety project experience.

Kenexis continues to work with the organizations and universities that are improving the safety concerns associated with chemicals or stored energy.
