ISO 9001:2008 Certified

Kenexis Quality Management System Registered

Kenexis, a company dedicated to providing independent engineering consulting services to ensure the integrity of instrumented safeguards and industrial networks, has been successful in gaining ISO 9001:2008 accreditation after an audit of the company's business practices by Performance Review Institute.

ISO 9001:2008 Certified ✅

ISO (International Organization for Standardization) is an independent, non-governmental membership organization and the world's largest developer of voluntary International Standards.

Our Quality System was implemented to ensure that we deliver consulting engineering services that consistently meet the requirements, needs, and expectations of our customers through efficient project execution with the highest degree of professionalism, while continually improving the effectiveness of our quality management system.

Ed Marszal, President: "We are very proud to complete our ISO audit, demonstrating our continued commitment to providing the best quality services to our clients and our ongoing commitment to improving our business, services and products."

About Kenexis

Kenexis is an independent engineering consulting firm. We ensure the integrity of instrumented safeguards and industrial networks. Using skills in risk analysis, reliability engineering, and process engineering, we help establish the design and maintenance specification of instrumented safeguards, such as safety instrumented systems (SIS), alarm systems, fire and gas systems. We use the same skills for industrial control systems (ICS) network design, cyber security assessments, and industrial network performance analysis.
