

Process Safety Training

Overview

Our Process Safety Training is an ever-growing library of online training for all things process safety including complete asynchronous online courses with testing similar to an instructor led course. Training also includes additional prerecorded process safety webinars. The premium annual subscription fee is a fraction of the fee for one instructor led course.

While today, asynchronous online training has become a favorite, we do offer corporate group settings onsite and online classroom process safety training. For individuals, we would encourage enrolling in the ISA.org training courses.

Our asynchronous online courses reside with our process safety software in the Integrated Safety Suite. This makes finding training on the software or process safety a click away for the user. Access to the software training is no cost and process safety classes require an annual training subscription or a Kenexis Unlimited contract.

Your Training Center

Our Training Center can be your private training center too. Corporate contracts include progress tracking matrix and the ability to upload your own corporate courses for private use by your staff. We also built it in the cloud to be replicated if for your company chooses to use it on a private server. If you are interested, contact us to arrange a demonstration and answer your questions.

Trianing Matrix

	HSE Introduction	Defensive Driving	HSE Manual	Employee Manual	IT Orientation	Cybersecurity	First Aid	Quality Program	Basic Process Control	Calibration and Testing	Control Valves and Actuators	Process Measurement	Safety Instrumented Systems	HAZOP Participant	LOPA Participant	SIL Verification	CAR Seal	Add Additional Courses
Bruce Cooper	C	P	C	C		C	C	C	C	C	C	C	C	C	C	C	C	
Rhonda Morales	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	R
Laura Mccoy	C	C	C	C	C		R	R	R	R	R	R	R	R	R	R	R	R
Kyle Spencer	C	C	C	C	C	C	R	C	C	C	C	C	C	P	R	R	R	
Madeline Grimes	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	
Paula Mayer	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	
Samantha Solis	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	
John Rowe	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C

Melissa Garcia	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	
Miss Tanya Gillespie	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	
Tracy Mitchell	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	
Jennifer Woodard	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	

Subscription Service

Our training in asynchronous online training accessed with an annual subscription so subscribers can retake any course or revisit difficult sections as often as necessary for refreshing knowledge or preparing for a certification exam. Our training does issue course completion certificates, but it is not a direct path to certification. The issued certificate states that you completed the course successfully and passed the test.

Basically, our training system is designed to increase awareness and knowledge of process safety challenges and consequently is offered at \$950 USD per year for all the online courses. Many people subscribe after taking the ISA EC50, 52, 54, or 56 courses will continue their studies in preparation for the certification exam using our training center.

Engineering management uses our training site to verify that their employees have an adequate knowledge of process safety to perform the tasks they are assigned.

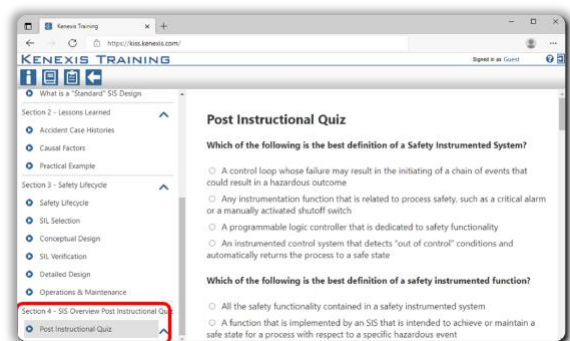

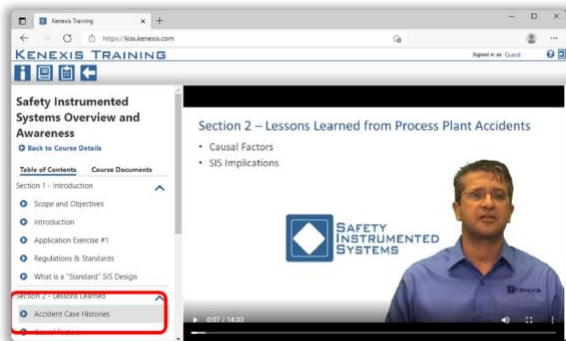

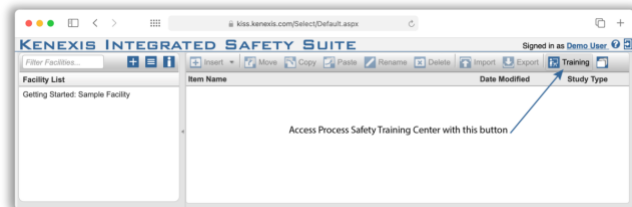

While the material is similar in overall content to an ISA or TUV course, if you want to take a certification exam you will need to take the ISA or TUV course.

Our Training Center software courses are integrated with our process safety software at no charge. Once you have a license (or trial license) to any of the software below, you can click on the Training button in the software and use the training for the software free of charge.

Online On-Demand Partial Course List:

- Layer of Protection Analysis (LOPA) – Participant Training
- Safety Instrumented Systems Overview and Awareness
- Safety Requirements Specifications (SRS)
- Security PHA Review
- SIL Verification
- SIS – Maintenance Responsibilities
- SIS – Management Responsibilities
- SIS – Operations Responsibilities
- Using Effigy
- Using Open PHA
- Using Vertigo
- Bowtie for Open PHA
- Calculating Fire Detector Coverage
- Introduction to Fire and Gas Mapping
- ISA TR 84.00.07-2019 Changes
- Open PHA Custom Reporting
- Scenario Coverage Gas Detector Placement
- Getting Started with Effigy – Fire and Gas Mapping Software
- Getting Started with OpScope – Procedure Design & Execution

Integrated Software & Training Suite

Kenexis Software and Training runs on our secure cloud servers and is accessed by any licensed user on any computer or tablet through a standard browser. The unique architecture ensures that your software is always available and up to date with the latest performance metrics and resource databases.

Our Process Safety Training Center is also integrated with the software on the Integrated Safety Suite so you can learn how to use the software, learn theory, and process safety engineering all in one place.

Our solution makes it easy for a licensed user to share project information with others including contracts, EPCs, and to leverage Kenexis process safety engineers for project assistance, outsourcing, and verification and certification of your analyses.

- Supports Single Sign On
- Compatibility with most browsers in most operating systems
- Training Center is part of the Integrated Safety Suite
- Extensive standard and custom equipment databases
- Detailed technical documentation and help
- Dedicated help desk and support
