The **Saudi Arabian Section of ISA (ISA-SAS)** in collaboration with **MSA - The Safety Company**

invites you to join us at the upcoming **live, in-person technical seminar**

Fire & Gas Mapping Technical Seminar

The MSA Fire and Gas System Design Seminar focuses on the performance-based determination of the optimal number of detectors and their locations required to appropriately address the risk associated with fire hazards along with the hazards of combustible and toxic gases. The seminar is based around the technical report ISA TR 84.00.07 from the International Society for Automation, which is the current consensus document for these design practices.

Presented by

Mr. Ed Marszal

Scan to Register

Ed is President and CEO of Kenexis, based in Ohio, USA. He has over 25 years of experience in risk analysis and technical safety engineering of process industry plants, including design of Safety Instrumented Systems and Fire and Gas Systems. Ed is an ISA Fellow and former Director of the ISA Safety Division and 20-year veteran of the ISA 84 standards committee for safety instrumented systems. He is also the author of the "Safety Integrity Level".

Date: Monday 2ⁿᵈ October 2023

Venue: VOCO Hotel, Al Khobar

       King Abdullah Street

Map: https://g.page/vocokhobar?share

Agenda:

  Registration: 08:00 to 08:30AM

  Seminar will begin at: 08:30AM

  Lunch: *Immediately after the seminar, at approx. 12:30PM*
